AREAS OF EXPERTISE

Air Quality Compliance &
Permitting specializing in
Chemical Processing Facilities

EDUCATION

B.S., Chemical Engineering,
University of Kentucky

B.S., Environmental Science,
Texas Christian University

MEMBERSHIPS

Air & Waste Management
Association

DIRECTOR, TECHNICAL SERVICES

The WCM Group, Inc, Humble, Texas - January 2008 - Present

- Client manager for petrochemical, storage tank, and oil field equipment manufacturing, chemical tolling, coating operations and container/barge/ship cleaning facilities. Accomplished in creating and maintaining good working client relationships.
- Efficiently manage a staff of engineers that provide air compliance and permitting support for various petrochemical manufacturing, storage, chemical transportation, coating operations, natural gas processing and electrical generation in Texas and across the nation.
- Prepare non-applicability documentation and reporting for EPA Toxic Release Inventory (TRI) Program
- Perform air emission calculations for tank storage, chemical processes, combustion source, loading, flares, coating, wastewater and container cleaning for reporting and permitting under Texas Permit by Rule, New Source Review applications and other state minor source applications.

PRINCIPAL ENVIRONMENTAL SPECIALIST/ SENIOR TECHNICAL PROFESSIONAL

HALLIBURTON Energy Services, Houston, Texas - 2001 - 2007

- Global environmental support for field and manufacturing operations for Americas.
- Provided multi-media compliance interpretations, program assistance, and obtained air construction and operating permits and training site personnel for approximately 100 locations.
- Updated Texas waste minimization plans and revised state stormwater (Texas, Louisiana, New Mexico and Colorado) plan program templates.

SENIOR STAFF ENVIRONMENTAL ENGINEER

ATOFINA Chemical, Inc., Houston, Texas - January 2001 - August 2001

- Responsible for complete plant environmental compliance.
- Implemented reduced cost by revising RCRA contingency plan, inspections, LDAR and HON programs.
- Updated management system to meet ISO certification.

SENIOR STAFF ENVIRONMENTAL ENGINEER

Crosby, Texas - November 1995 - December 2000

- Responsible for plant compliance of RCRA wastewater treatment units, two injection wells, stormwater, fresh water and solid waste programs.
- Managed the SARA 312 & 313 programs.

ENVIRONMENTAL ENGINEER

- Supervised two senior environmental engineers for media and capital projects while managing plant programs for four batch/continuous processing units.
- Revised facility air permits to achieve Title V compliance while maintaining compliance under two agreed orders.
- Provided leadership for community, professional, and agency outreach programs.
- Developed comprehensive management system utilizing team concepts that assured continuous compliance and improvement.

SENIOR ENVIRONMENTAL ENGINEER

Calvert City, Kentucky - June 1985 - November 1995

- Responsible for Title V strategy permitting, construction permits, SARA 313, waste minimization, CMA, Corporate, and Community coordination.
- Acted as interim environmental manager while mentoring four new environmental engineers.
- Responsible for RCRA Part B compliance programs, solid and hazardous waste, asbestos, and facility air construction permits.

KYNAR ENGINEER

- Provided technical expertise for Kynar department to ensure that product quality, safety, and production goals were met.
- Provided effective project management for capital projects in areas of engineering design, procurement, installation, cost control, and start-up.
