EXECUTIVE VICE PRESIDENT

The WCM Group, Inc, Humble, Texas - July 1997 to Present

Manages the activity of the company's staff of engineers, scientists, and environmental specialists. Acts as project director on key permitting/compliance projects. Responsible for managing client accounts and providing direct interface with clients to assure client(s)/projects' expectations are met.

Overall responsibility for technical aspects of projects in the fields of environmental permitting, waste management, spill response, wastewater treatment, air pollution control, site assessments and due diligence. Coordinates activity with regulatory agencies required by federal regulations such as RCRA, CERCLA, CWA, CAA and SARA as well as state and local rules.

Responsible for management of environmental compliance and permitting activities for a variety of clients, which include the petrochemical industry, oil and gas industry, public health community, the chemical transportation industry, and the electric generation industry.

Directing project management for the siting and environmental permitting activities for new electric generation facilities. These permitting activities have been to satisfy both Federal and State programs which include:

- Section 106 of the National Historic Preservation Act
- Federal Threatened and Endangered Species Act
- Sections 401, 402, and 404 of the Clean Water Act
- Clean Air Act (Prevention of Significant Deterioration, New Source Review, Nonattainment Review, and Acid Rain)

The siting activities have included:

- Identification/coordination of potential water supplies;
- Local/state permitting of water supplies;
- Participation in public outreach programs.
- Meeting with local, state and regulatory officials.
- Participation in environmental public meetings and public hearings
